Remote React / React Native Developer

Working on high-load client side application as well as developing internal tools to simplify and streamline work process across various teams.

Using React.js, MobX-State-Tree, UI-Router as main frameworks to build internal tools.

Created an internal platform to manage campaigns and notification delivery system.

Worked on a content managing platform to allow authors edit, publish, and create immersive and static novels for users to consume worldwide.

Currently working on a React Native application that allows users to read and listen to novels created by authors around the world.

Main tech stack that I use daily:
* React Native
* MobX / MobX-State-Tree
* Firebase
* PostgreSQL
* NestJS

Camino Financial

Frontend-разработчик

Started as an intern back in mid-2019. After 2 months of extensive hands-on experience in React and GatsbyJS solidified my position as Front-End Web Developer. Was primarily responsible for form validations, animations, and implementing proposed UI. Worked closely with the design team to transform prototypes made in Xd, Figma, and Framer to React-based components. The latest project that our team tackled involved Vue, Nuxt, styled-components, and GSAP. Projects that I participated in involved styled-components, Framer-Motion, React, GatsbyJS, MongoDB, PostgreSQL, Express, Firebase, Node, and my personal favorite - GSAP.

Education

Bachelor

2019	**Thinkful**
	Web Development, Full Stack Web Developer

2017	**California State University, Northridge**
	Bachelor of Science, Marketing

2015	**Los Angeles City College**
	Associate of Arts, Social and Behavioral Sciences

Tests, examinations

2020	**HackingWithSwift.com**
	HackingWithSwift, iOS development using SwiftUI

Further information

About me

I am a web developer with many years of experience in customer-centric development. My goal is to create remarkable experiences online. I use MERN Stack as my main daily tool. Although lately, I am utilizing NextJs's capabilities in order to create a full fledge server side rendered applications. Additionally, my most recent place of work allows me to explore nits and picks of mobile development via React Native. Occasionally, I gravitate towards other languages such as Swift or Dart to create mobile applications. I am passionate about software development and anything that is related to the technology of our age.
